

# Complete Catering Management System

Connecting clients, caterers, and administrators in one unified platform.

## THE CHALLENGE

Event planning involves scattered communication, manual booking processes, and difficulty managing multiple caterers and clients across different platforms.

## OUR SOLUTION

PlatePal unifies the entire catering ecosystem—clients find caterers, caterers manage bookings, and admins oversee the platform—all in one place.

## THREE USER ROLES, ONE PLATFORM

### Client

- Browse and search caterers
- View menus, packages & pricing
- Send booking requests
- Message caterers directly
- Track booking status
- Save favorite caterers
- Leave reviews & ratings
- Manage event details

### Caterer

- Create business profile
- Manage menu items & add-ons
- Set up service packages
- Accept/decline bookings
- Set final pricing
- Respond to client messages
- Track earnings & revenue
- Reply to reviews

### Admin

- Approve/reject caterers
- Manage user accounts
- Feature top caterers
- Monitor system activity
- View platform analytics
- Handle system feedback
- Oversee bookings & revenue
- Moderate reviews

## COMPLETE SYSTEM WORKFLOW

1

### Caterer Registration

Caterer signs up and submits profile for admin approval

2

### Admin Approval

Admin reviews and approves caterer profile

3

### Profile Setup

Caterer adds menus, packages, and pricing

4

### Client Discovery

Client browses and searches for caterers

5

### Booking Request

Client sends booking with event details

6

### Negotiation

Client and caterer discuss via messages

7

### Confirmation

Caterer accepts and sets final price

8

### Event Completion

Caterer marks booking as complete

9

### Review & Feedback

Client leaves rating and review
